Really fun game.

Pro's:

Fast Combat

Balanced Characters

Switchable Skills and upgradable Items for more diversity.

Different game mods. (Ranked V Practice (bots) V Missions V Bossfights)

Different maps (Capture the flag V Hold the point V Hold an orb V ...)

Con's:

No one is playing this game right now. 3.7Players on avg. a day! So you can only play against bots or do the solo mission.. I like this game. No matter how bad it is.

+ fun gameplay

+ few pers, some very interesting

+ can play in team

+ fun kills in pvp :)

- disbalance on pvp (but if you play well, it not so important)

- bad comunity in public chat (but com'on, Dota 2 also has)

- sometimes bots in pvp is so stupid (but how else)

- now pvp is dead. It's so, so bad. Unfortunately ; (. What an amazing co-op or single player 3d shooter. It was very easy to launch in the action, match making is fast and efficient.

This game holds vast capacity for replayability and it reminds me of very nice old classic 2d shooters back in the day. (Anyone remembers "flashback"?)

A top-quality product that should NOT be absent from the library of a gamer who claims to be a fan of quality indie games.

The character design and the background of the battlefield design is PARTICULARLY good. Congratulations to the game's art designers.

TRY IT!!!. Something like League of Legends V Overwatch only in 2D

Worth 10\u20ac for sure
